

**G-22 ANTI-SEIZE LUBRICANT FOR ALUMINIUM****Description**

It is a White solid lubricant mixed in water. PTFE lubricant is used to optimize its lubrication properties

This protectiong film is abrasión resistant.

**Aplication technology****General properties**

- It provides constant coefficients of friction
- Colourless appearance
- Its avoids galling in surfaces under load and motion..
- Facilitates sliding.
- It provides a smooth tightening of the fasteners dues to its low coefficient of friction.

Dip-spinning
**Uses**

Lubrication of parts in bulk that require lubrication og high performance (surfaces under load and tensión an under motion).

THIS TREATMENT IS APPLIED DIRECTLY IN LINE OR IN COMBINATION WITH PREVIOUS AND SUBSEQUENT APPLICATIONS.
GALOL S.A. offers the possibility to reduce logistic costs between the different operations of manufacturing of the part.
