KAMAX GALOL COATINGS S.A.U. offers a wide range of surface coatings primarily focused on corrosion protection, as well as decorative, mechanical and tribological applications, including friction coefficient control.

Furthermore, KAMAX GALOL COATINGS S.A.U. operates in accordance with the specifications and standards of all major OEMs in the market, as well as applicable international standards, complying with virtually all surface finishing requirements demanded by the automotive industry.

Additionally, KAMAX GALOL COATINGS S.A.U. supplies coating solutions for other industrial sectors, including railway, agricultural, civil construction, wind energy, photovoltaic and other high-demand industrial applications.

Servicios:

ZINC FLAKE COATINGS

KAMAX GALOL COATINGS S.A.U. provides state-of-the-art Zinc Flake Coating systems, mainly designed for high corrosion resistance applications in the automotive industry and other industrial sectors.

These non-electrolytic anticorrosion systems are based on zinc and aluminum flake technologies, providing high-performance galvanic protection, excellent mechanical behavior and freedom from hydrogen embrittlement, making them especially suitable for fasteners and high-strength components.

Our processes are approved for both bulk application (Dip-Spin / Dip-Drain-Spin) and rack application (Rack Coating / Spray), adapting to the geometric, functional and aesthetic requirements of each component.

INORGANIC Coatings

- GEOMET® 321
- GEOMET® 500
- GEOMET® 430
- GEOMET® 720
- GEOBLACK®
- Topcoats

ORGANIC Coatings

- DELTA-PROTEKT®
- DELTA-TONE®
- MAGNI®
- ZINTEK®
- Topcoats

All systems comply with the main automotive standards and specifications, as well as environmental requirements.

ELECTROPLATED COATINGS

KAMAX GALOL COATINGS S.A.U. provides high-performance electroplated coating systems for automotive and industrial applications, specifically developed for corrosion protection and functional enhancement of metallic components.

The processes include alkaline zinc coatings and zinc-nickel alloy coatings, complemented with passivation systems, sealers and specific topcoats for friction control and OEM requirements.

Available Coatings

- Alkaline Zinc
- Zinc-Nickel (Zn-Ni)
- Transparent, black and iridescent passivations
- Organic and inorganic sealers
- Lubricating and tribological topcoats

Our processes are approved for bulk application, adapting to the geometric, functional and aesthetic requirements of each component.

GALOL

THE KAMAX COATING EXPERT

CRYSTALLINE COATINGS

KAMAX GALOL COATINGS S.A.U. offers crystalline phosphating treatments for automotive and industrial applications, designed to improve corrosion resistance, paint adhesion and tribological performance of metallic components.

Coatings:

- Zinc phosphating
- Manganese phosphating
- Calcium phosphating
- Lubricants
- Organic and inorganic sealers
- Lubricating and tribological topcoats

These treatments are used as a functional base for painting, lubrication, cathodic electrocoating and applications with high mechanical and anticorrosion requirements.

Our processes are approved for bulk application, adapting to the geometric, functional and aesthetic requirements of each component.

PVD COATINGS

KAMAX GALOL COATINGS S.A.U. provides PVD (Physical Vapor Deposition) coating solutions mainly intended for decorative applications.

PVD coatings allow high-quality decorative surface finishes to be achieved.

Available Materials

- Titanium
- Zirconium
- Chrome

SPECIAL AND PRE-APPLIED COATINGS

KAMAX GALOL COATINGS S.A.U. provides different special solutions for fasteners and industrial components, including sealing, locking, tightness and functional pre-applied coating systems.

Coatings

- FINIGARD®
- TUFLOK®
- PRECOTE®
- NYPLAS®
- Etc.

TECHNICAL CONSULTATION

KAMAX GALOL COATINGS S.A.U. offers a wide range of coatings and functional systems adapted to the specific requirements of the automotive industry and other industrial sectors.

We invite you to contact our technical-commercial team to analyze your requirements and provide the most suitable solution.

Our team will be pleased to advise you regarding the currently available and approved coatings for each specification and industrial application.
